

Logotype Guidelines

VERSION 1.2

OVERVIEW

Our main logotype

The SIWI logo is composed of a symbol and a wordmark.

The symbol + wordmark logo is the primary logo and should be the primary choice.

The symbol alone can be used as a secondary logo on branded platforms where the organization name is visible, such as on social media.

About the logotype

The symbol is composed of a circle, the S in the SIWI wordmark and two white S borders.

Altogether, the symbol is a visualization of who we are and our vision: Water valued and governed for a resilient, just and healthy world.

Secondary logotype

OVERVIEW

Colour variations

The primary and secondary logotypes exist in three colour variations, to ensure flexibility in application.

The full-colour logo is our standard logo and should be the primary choice.

The white-blue logo and white logo should only be used when the design doesn't allow for the full-colour logo to display in good contrast.

Full colour

White-blue

White

APPLICATION

Placement

Always place the SIWI logotype in the corner of a layout area. Make sure there is enough blank space around it: Be careful of placing other objects or logos too close to the SIWI logo.

APPLICATION

Usage on backgrounds

The full-colour logotype should be used only on white or light backgrounds. Avoid using the full-colour logo on photographs unless the logo sits on a very light area of the image.

The white-blue logotype should be used only on dark backgrounds. Avoid using the white-blue logo on photographs unless the logo sits on a very dark area of the image.

The white logotype should be used only on medium dark to dark backgrounds. The white logotype. Avoid using it on very light areas of an image.

Choose the logo version that gives you as much contrast as possible (light on dark, dark on light). This increases readability.

APPLICATION

Incorrect use of logo

Mistakes happen easily, so please be mindful when adding our logotype to presentations, documents and more. Here are some examples of incorrect use of the logotype.

Do not crop the logo.

Do not add a border or place the logo inside shapes.

Do not distort the proportions.

Do not change colours.

Do not change internal sizes or placement of logo elements.

Do not use drop shadows or other visual effects.

Do not change the transparency of the logo.

Do not rotate the logo.

Swedish Water House sub-brand logotypes

OVERVIEW

Swedish Water House sub-brand logotypes

The Swedish Water House sub-brand logotype consists of two separate logo units: The **Swedish Water House logo** and an **explanatory unit**, that clarifies the relation between Swedish Water House and SIWI. The two units should always be used within the same layout area. See Placement section for details.

The primary logotype should be used when we are producing material in-house.

The secondary logotype should be used for external situations, when only one logo can be used.

SUB-BRAND APPLICATION

Placement – primary logotype

The sub-brand unit and the explanatory unit should always be used within the same layout area. Never use only one of the units.

Place the two units in different corners. The sub-brand unit (SBU) should be placed first and slightly larger than the explanatory unit (EU), to help clarify who is the sender.

The logo units can be displayed in a horizontal layout or a vertical layout.

Make sure there is enough blank space around the logo units: Be careful of placing other objects or logos too close to them.

EXPLANATORY UNIT

SUB-BRAND APPLICATION

Placement – secondary logotype

The secondary sub-brand logotype can be used when sharing logos with partners or in situations when it's only possible to use one logotype.

Always place the logotype in the corner of a layout area. Make sure there is enough blank space around it: Be careful of placing other objects or logos too close to the logo.
